

What is bluesky?

Bluesky is a decentralized social media platform designed for open and community-driven conversations. It allows users to share posts, follow others, and engage through likes, reposts, and replies. Built on the AT Protocol, Bluesky gives users more control over their data, feed algorithms, and identity. With a focus on transparency and user autonomy, it offers a fresh alternative to traditional social networks. Whether for discussions, content sharing, or networking, Bluesky fosters an open and customizable online experience

bluesky in Five Steps

- **Sign Up for an Invite** – Go to the Bluesky website or download the app and request an invite code (if required).
- **Create an Account** – Enter your email, create a username, and set a password.
- **Set Up Profile** – Upload a profile picture, write a bio, and adjust privacy settings.
- **Follow & Post** – Search for people or topics, follow them, and start posting updates.
- **Engage with Others** – Like, reply, repost, and join conversations on trending topics.

By following these steps, you can easily connect and stay in touch with your friends and family on bluesky
